LIBERAL ARTS

WE LOOK AT ENVIRONMENTAL ISSUES FROM ALL SIDES ... ESPECIALLY OUTSIDE

ADD SOME GREEN TO YOUR DEGREE

The Environmental Studies minor is an excellent complement to any major, and can also serve to enhance your career opportunities. You earn an Environmental Studies minor through 15 credit hours, drawing from the expertise of faculty and departments across campus. There are no walls. The goal is to broaden your perspective, while allowing you to follow your individual interests.

You will expand your viewpoint and gain new skills for environmental analysis. For example, you can learn more about environmental ethics and media; ecology and wildlife; environmental education and policies; green buildings and organizations. The possibilities to widen your knowledge base are nearly endless. The minor presents a unified theme while providing for individual paths to student success.

THE ENVIRONMENTAL STUDIES MINOR IS BUILT AROUND:

- one core course
- three topic courses in the areas of: environment, society and skills
- one unifying final course

For the topic courses, choose from the following diverse offerings: Ecology, Climate, Physical Environment, Gardening, Resource Policy, Conservation, Sustainability, GIS, Web Design, Team Building, Ethics and Management.
