

Sustainability Council
Minutes
February 14 2013

Members present: C. Anz, S. Belletire, M. Bonney, J. Harrell, C. Prozesky, M. E. Wilber, K. Schachel

1. New Sustainability Network: Profile sign-up is now live, will continue to be tweaked and updated in the future. Currently, only faculty and staff can join - student profiles and possible staff-fac separation to follow. Kris sent the link to join, please do so!
2. Kris shared brief to VC's office. Still waiting to hear back about DCEO Food-Scrap grant application. More recycle bins have been acquired for campus. Tom continues RecycleMania efforts.
3. Chancellor Sustainability email blitz has been pushed back by Chancellor, we expect it to be released soon.
4. **Curriculum Cmte.** plans to work with Sustainability Network team further to continue a discussion of adding course information to Network and create a comprehensive picture of what is happening with interdisciplinarity, sustainability education, and project teams on campus.
5. If the Council has TedTalk, YouTube, book, article, or other media resources, please send to tosustainability@siu.edu to be included in resources list on website. (Resources for both students and instructors)
6. **Steve** will contact David Yepsen to inquire of the possibility of the Council and Paul Simon Institute collaborating to offer a sustainability and policy themed series.
7. **Green Fund Cmte:** in the future, projects dealing with chemicals or substances under CEHS jurisdiction must indicate they are following all CEHS procedure and must follow CEHS project close-out procedure. Current bio-diesel converter is a problem, plans have been made to move it to hog farm. We discussed adding a box to check or some similar notifier on the Green Fund Project Application PDF to indicate PI compliance with CEHS regulations.
